# Corel VideoStudio Crash after Windows 7 Update

There has been an update to Windows 7 that is causing issues with VideoStudio Pro X8 and earlier VideoStudio versions. There is a hotfix for the issue in VideoStudio ProX8

[:http://dwnld.videostudiopro.com/updates/x8/VSX8\\_HotFix\\_2.exe](http://dwnld.videostudiopro.com/updates/x8/VSX8_HotFix_2.exe)

For those of us who have older versions of VideoStudio, we waited with bated breath to see how Corel would handle this situation. Either they'd *force* us to upgrade to version 9, or be nice to the users by making a hotfix. I'm happy to say they did the latter. This builds enormous goodwill and long-term loyalty. Thanks Corel! It IS noticed!
