## Corel is on Windows® 7!

Corel is thrilled to celebrate the launch of Windows® 7—a bold new operating system that will help us deliver new and exciting ways for consumers to interact with creative software. Offering a more natural and hands-on experience, we have a whole new lineup of products that showcase the new features in Windows 7, including Windows Touch. Here's a snapshot of the latest from Corel on Windows 7. See [www.corel.com](http://www.corel.com)

### Corel Digital Studio 2010 on CNN

Corel's VP Product Marketing, Daniel Weisbeck, sat down with CNN's Jim Boulden to discuss the all-new Corel Digital Studio 2010 and Windows 7.

### Digital painting with Windows 7 Touch

Draw and paint directly on screen, thanks to the touch capabilities built into Windows 7. Many of Corel's products leverage these new features—enabling you to get in touch with your creativity on a whole new level.

### Try Corel Digital Studio 2010 with Windows 7

Corel Digital Studio 2010 takes full advantage of Windows 7 touch-screen capabilities, moving beyond traditional menus to a more natural and exciting creative experience.

### Video: Windows 7 software from Corel

Jennifer Fraser, Corel User Experience Designer, talks about the hallmarks of great software design and how Corel offers consumers all-new creative experiences with Windows 7 and Windows Touch.

### Corel Products Support Windows 7 Features

Windows 7 was designed to make your PC simpler and your everyday tasks easier. Corel's latest software takes full advantage of new Windows 7 features, including:

#### Windows Touch

With Windows Touch, Corel's new software puts new creative possibilities right at your fingertips. We're moving beyond traditional menus and mouse clicks to literally put you in touch with your content—whether it's a favorite photo, video or digital painting. See Windows Touch in action.

#### Jump Lists

Windows 7 includes new Jump Lists that make it faster and easier to access the tools and content you need by giving you quick access to recently used features.

#### Libraries

Libraries are a new way of creating a collection of related files in Windows 7. Now you can group files even if they aren't saved together on your PC. It's easier than ever to find what you're looking for!

#### Battery Optimization

No one likes to be interrupted by a drained battery. Building on the new battery optimization capabilities in Windows 7, Corel's software makes sure you can work or play without interruption.

### Corel's EVP of Products, Joe Roberts, talks about why he thinks Microsoft "got it" with Windows 7.

*"Corel is committed to ensuring consumers have the most enjoyable and creative experience possible with our products. The introduction of Corel Digital Studio 2010 in September and the introduction of Corel Paint it! Touch are prime examples of the new ways consumers can express themselves creatively through Windows 7."*

Joe Roberts - EVP of Products

The CDU Committee meets 1st Tuesday of each month.  
Approx - 7pm until 9.30pm - venue to be advised.

Next CDU Meeting will be held on third  
Tuesday in month - 16 February 2010

# Your 2009 CDU Committee Members

**2009 Committee:** David Much, Jan Edgar, Julie Adams, Geoff George, Fred Jones, Lance Fishman, Jenette Youngman, Richard Crompton & Darryl Howman.

Your 2009 committee members are pictured here, with Geoff George, Fred Jones, Richard Crompton and Jan Edgar missing for these photos! This was our last committee meeting for 2009 and the general direction and future of our group was the main discussion, with matters arising from our October meeting forum as well as AGM details and November meeting organisation. We invited members, Alan Stephenson and Kevin Rowley to join us and help with the planning of new ideas/venue for our group in 2010.

We thank all the committee for their efforts, time and energy they have invested in CDU. Jan Edgar is not continuing after many, many years on the committee, so some new blood is needed as well help from all members contributing something for time to time. Items for the Magazine or Bulletin, presentations are all most welcome.

Jan has a CDU number of 19, and has been with CDU since 1994-1995. She tells us that the first group she joined was the **Ventura Users Group**, a typesetting based group in 1991 and 1992. That group finished and in 1993 when another group opened it's doors to all interested in electronics publishing! **EPIC - Melb PC** "Electronic Publishing on IBM's and Compatibles" and finished late 1995?

The oldest Corel Down Under magazine Jan has is Vol 2 No.6 - September 1994, Melb Chapter of ICA (*Australian Chapter of ICA USA - International Corel Association*) and the Editorial says, "as this our first full year as a users group lets look back and see where we have been. We kicked the group off in late 1993 and formalised the group at the start of this year 1994". Also on the 5 November 1994 the first full day conference was held with lunch and refreshments for a small fee!

## WinZip® 14 Takes Advantage of Windows® 7 Innovations

New WinZip® 14 offers many usability enhancements and improved security.  
Press Release - Ottawa, Canada - October 27, 2009

WinZip Computing, a Corel Company (NASDAQ:CREL - News; TSX:CRE - News), announced today the release of WinZip® 14.0. WinZip 14.0 reinforces the company's commitment to helping its wide range of users work smarter, safer and faster by introducing features that streamline zipping and encrypting processes and taking advantage of new functionality offered in Windows® 7.

WinZip is a powerful and easy-to-use compression and encryption utility that quickly zips and unzips files to conserve disk space, greatly reduce email transmission time and protect confidential data. It is the data compression choice for thousands of organizations, government agencies and Fortune 500 companies, as well as millions of home users. More than 190 million users have downloaded copies of WinZip from CNET's download.com alone.

### Windows 7 Enhancements

Windows 7 includes many significant enhancements that simplify working with your documents, folders, and programs. WinZip 14 takes full advantage of these new features to make working with your Zip files easier.

\* **Libraries:** WinZip 14 provides support for Windows 7 libraries. Libraries group together folders with a common theme; for example, the Pictures library puts all of your folders that contain pictures in one convenient place. With WinZip 14 you can simply select the Pictures library and zip all of your pictures, no matter where they are. And these pictures will be compressed smaller than with any other compression tool using the Zipx files format which includes lossless JPEG compression. Backing up your important data is a breeze using libraries in the WinZip Job Wizard.

\* **Jump Lists:** WinZip 14 also supports the new Jump Lists. Simply pin the WinZip icon to your taskbar for quick and easy access to frequently used zip features, as well as to recently used Zip files and WinZip jobs.

\* **Windows Touch:** If you have a touch screen computer you will love WinZip's full support for gestures—simple finger movements—on your touch screen PC. Using gestures, you can easily scroll through the contents of your Zip files. You can even pan, zoom, and rotate your images in WinZip Pro's built-in Image Viewer without touching your keyboard or mouse!

Other interface enhancements include improved Dialogs to the Windows 7 style and new filtering and organizational support for finding your files and archives.

### Improved Security

A key reason why many users purchase WinZip is its powerful, easy-to-use AES encryption. WinZip 14 introduces automatic wiping of the temporary copy of an encrypted file using the U.S. Department of Defense standard (DoD 5220.22-M). In addition, WinZip 14 recognizes Intel-based computers with built-in AES encryption and uses the available hardware support to make encryption operations two to three times faster.

### Availability

WinZip 14 is available for download today from <http://www.winzip.com> or from your preferred software supplier.

### About WinZip Computing

Founded in 1991, WinZip Computing was acquired by Corel Corporation in 2006. WinZip Computing continues to offer the world's most popular Zip utility for Windows®, WinZip, along with WinZip® Self-Extractor and WinZip® E-Mail Companion.
