AfterShot Pro 2

The fastest way to work with RAW

Overview

Corel® AfterShot™ Pro 2 is changing the way the world works with RAW, with 64-bit performance that's 30% faster than AfterShot Pro 1 and up to 4x faster than the competition. AfterShot Pro 2 is the best way to unlock the freedom and flexibility of shooting RAW. With unparalleled speed and power, and a sleek new interface, it's a RAW converter, non-destructive photo editor and complete high-speed photo manager in one. Whether you're batch processing non-destructive photo editor and complete high-speed photo manager in one. Whether you're batch processing thousands of RAW images, or making detailed adjustments to your latest prize-winning shot, AfterShot Pro 2 gives you the tools to quickly take complete control over every aspect of your photo workflow.

Target market

- **Professional and semi-professional photographers** who need to streamline the process of organizing, reviewing, adjusting and outputting photos to get files to clients faster and maximize the time they spend behind the camera.
- **Photography enthusiasts** who shoot a high volume of photos and need a workflow solution to help them take control of photo management, made adjustments faster and output photos quickly.

Competitive advantages

AfterShot Pro 2 offers photographers a fast, flexible workflow solution that streamlines everything they do after taking their photos, from organizing and searching, to adjusting RAW images and output generation.

- **Breakthrough 64-bit performance** – save time and get results sooner with the world's fastest RAW conversion software, now 30% faster than the previous version and 4x faster than the competition
- **Advanced non-destructive editing** – refine an unlimited number of photos while ensuring your originals are always protected
- **Powerful photo workflow** – easily manage your photos and design the workflow that meets your needs
- **Flexible photo management** – work with your photos wherever they are located—in existing folders, on a network or on a memory card—no cataloging required

Key features and benefits

64-bit power

Get more processing power and remove memory limitations with AfterShot Pro's new 64-bit architecture. Access more memory and get more stability and responsiveness app-wide.

Updated camera profiles

This release includes 26 new camera profiles and supports RAW files from all major camera manufacturer, supporting more than 250 camera profiles overall.

Complete High Dynamic Range (HDR) tools

Windows only. Free update for Mac and Linux coming Fall 2014. Create impressive photos with intense visual contrast using new HDR tools. Combine multiple exposures to create a single, stunning HDR photo. Then refine your photo in the AfterShot HDR module with Smart Photo Fix, White Balance, Brightness/Contrast, High Pass Sharpening and more.

Enhanced workspace

Enjoy a more fluid workflow with a modern, streamlined interface. Enhanced Zoom delivers better previews of smaller images and a new image Reset button lets you undo all your changes and view your original photo with a single click.

Key features and benefits

Easier batch processing

Speed through organizing and enhancing your photos with faster and easier batch processing tools and a redesigned dialog that shares the same new clean interface of AfterShot Pro 2. Rename multiple files, apply adjustments to multiple photos at once and export images to one or more pre-defined images formats and sizes.

Red Eye Removal

Get precise control when cleaning up red eye in your photos.

Non-destructive editing

Correct and enhance photos without altering your original. Whether you're shooting in RAW or JPEG, you can alter photos with a wide range of nondestructive tools, including Crop, Straighten, Highlight Recovery, Noise Removal, Color and more.

Multi-version processing

Easily make adjustments to multiple versions of your master photo to explore various camera settings, such as exposure, lens correction and white balance—without ever changing your original photo.

More options for organizing

Store your photos in existing folders or import them into searchable catalogs. You can also create custom catalogs or even portable catalogs that can be moved to another computer.

Robust search tools

Find photos easily with powerful Metadata tools that let you search based on your own ratings, labels, tags and keywords, or by camera settings like shutter speed, aperture, date and more. Tailor metadata sets to display only the information you want to see or use presets to attach information to your photos for easy searching.

Selective editing

Apply adjustments exactly where you want them without affecting other parts of your photo with the unique Regions and Layers capabilities of AfterShot Pro.

Compatible with Corel® PaintShop® Pro

For creative photo editing or advanced image manipulation, you can easily send images to Corel PaintShop Pro to create breathtaking creative compositions.

Batch output

Process batches of images quickly using preset or custom settings. Set up batches for Web, print, galleries, or easy backup.

The CDU Committee meets 1st Tuesday of each month.
7pm until 9.30pm - 8 Pamela Place, Ringwood North, 3135

Next CDU Meeting will be held on third
Tuesday in month - 19th August 2014

AfterShot™ Pro 2

The fastest way to work with RAW

Product Information Sheet

System Requirements

Windows®

- Windows® 8.1, Windows® 8, Windows® 7, Windows Vista® and Windows® XP with latest service pack (32-bit and 64-bit editions)
- Intel® Pentium® 4 or later or AMD Athlon™ 64 or later (multi-core processor recommended)
- 2GB of RAM (4GB recommended for HDR function)
- 400MB of available hard-disk space required
- 1024x768 resolution with 16bit color display (1280 x 768 resolution with 24 bit or higher color display recommended)
- Internet connection required for online help or program update
- CD/DVD drive for installation (Optional)

Macintosh®

- Mac OS®X 10.7.3 or later (32bit and 64bit editions)
- All Intel® Macs model are supported
- 2GB of RAM
- 400MB of available hard-disk space required
- 1024x768 resolution with 16bit color display
- Internet connection required for online help or program update
- CD/DVD drive for installation (Optional)

Linux®

- Fedora® Core 10 or Ubuntu® 8.04 or later (32bit and 64bit distributions)
- Intel Pentium 4 or later or AMD Athlon™ 64 or later
- 2GB of RAM
- 400MB of available hard-disk space required
- 1024x768 resolution with 16bit color
- Internet connection required for online help or program update
- CD/DVD drive for installation (Optional)
- Dependencies: Glib 2.4, KDE or GNOME recommend (full list of dependencies in RPM & DEB packages)
- Enable desktop compositing and freedesktop.org-compliant window manager (KDE, Gnome, and others) recommend

Formats supported

- RAW file support from most leading camera manufacturers; see www.corel.com for the latest listing: ARW, CR2, CRW, DCR, DNG, MRW, NEF, NRW, ORF, PEF, RAW, RW2, RWL, SR2
- JPEG, TIF

Cameras Supported AfterShot Pro 2 introduces 26 new RAW camera profiles, covering a variety of popular Camera models. Updates are ongoing.
