### Corel London comes up trumps!

One of CDU's long time members, and also a committee member and presenter at our meetings has glowing things to say about Corel Corporation in England. Jenette was having huge problems loading Corel Draw back onto her machine after she had computer problems and lost the program. The main hassle was trying to re-register the program and of all things, changing her email which had recently been changed.

After many hours of extreme frustration and emails backwards and forward Jenette finally put in a call to our contact in England, Jo Leavens, who has been so supportive of our group. Well, according to Jenette, Jo could not have been more help full. After quite some more time, without Jo giving in, finally the problem was completely fixed.

Jenette is now back fully using Corel Draw and can't praise Jo high enough.

We all have our beefs with Corel from time to time, but isn't it nice to hear a great success story ending with a very happy customer.
